Filmmaking
& VFX

Marketing
& Branding

Entertainment
& Installation

Memory
& Documentary

One Point, Unlimited Possibilities.

REAL WORLD CAPTURE
POINT CLOUD

CAPTURE ONCE >>> SPATIAL FOUNDATION >>> MULTIPLE POSSIBILITIES

FILMMAKING

Set reconstruction,
pre-visualization,
location planning,
and on-site supervision.

MARKETING & BRANDING

Virtual experience,
spatial tour, interactive showcase,
digital asset for sales and business.

ENTERTAINMENT

VR / AR experience,
projection mapping,
interactive installation,
location-based entertainment.

MEMORY

Immersive wedding memory,
event documentation,
cultural heritage,
personal & family archive,
interactive storytelling.

REAL-WORLD ACCURACY
True scale and detail as the foundation

VERSATILE DATA
Point cloud, mesh, textures, panoramas

MULTIPLE OUTPUTS
3D, 2D, interactive, immersive

FASTER WORKFLOW
Capture once, use everywhere

CREATIVE FREEDOM
Fueling 3D and visual artists with real places to create

SPATIUM
SPATIAL TECHNOLOGY STUDIO

Back then, digital twin workflow used to be very expensive for industry creative

01 LASER SCAN
Capture the real world

A **laser scanner** captures millions of spatial measurements (XYZ + intensity) from the real world with high accuracy.

02 POINT CLOUD
Accurate spatial data

The result is a **point cloud** — a precise 3D representation made of millions of spatial points with color and intensity information.

03 3D GEOMETRY
Structured and editable

From the point cloud, we generate **3D geometry (mesh)** — a structured, editable model with clean topology and textures, ready for 3D production, visualization, and simulation.

04 3D GAUSSIAN SPLAT
Photorealistic and immersive

The same data can be converted into **3D Gaussian Splat** — a lightweight, photorealistic, and immersive representation ideal for real-time experiences, virtual tours, and interactive applications.

REAL WORLD › CAPTURE › POINT CLOUD › PROCESS › 3D GEOMETRY › OPTIMIZE › 3D GAUSSIAN SPLAT

Gaussian splat offers unbeatable efficiency for 3D reconstruction without quality and performance degradation. It also offers rich visual information with wide range of utilization to the end-product.

SPATIUM
SPATIAL TECHNOLOGY STUDIO

From just seeing,
to experiencing.

From just guessing,
to verifying.

SPATIUM
SPATIAL TECHNOLOGY STUDIO

The way we see space

Photograph
only captures image

Videograph
only captures moment

Digital Twin
captures the whole space, objects around, and their context

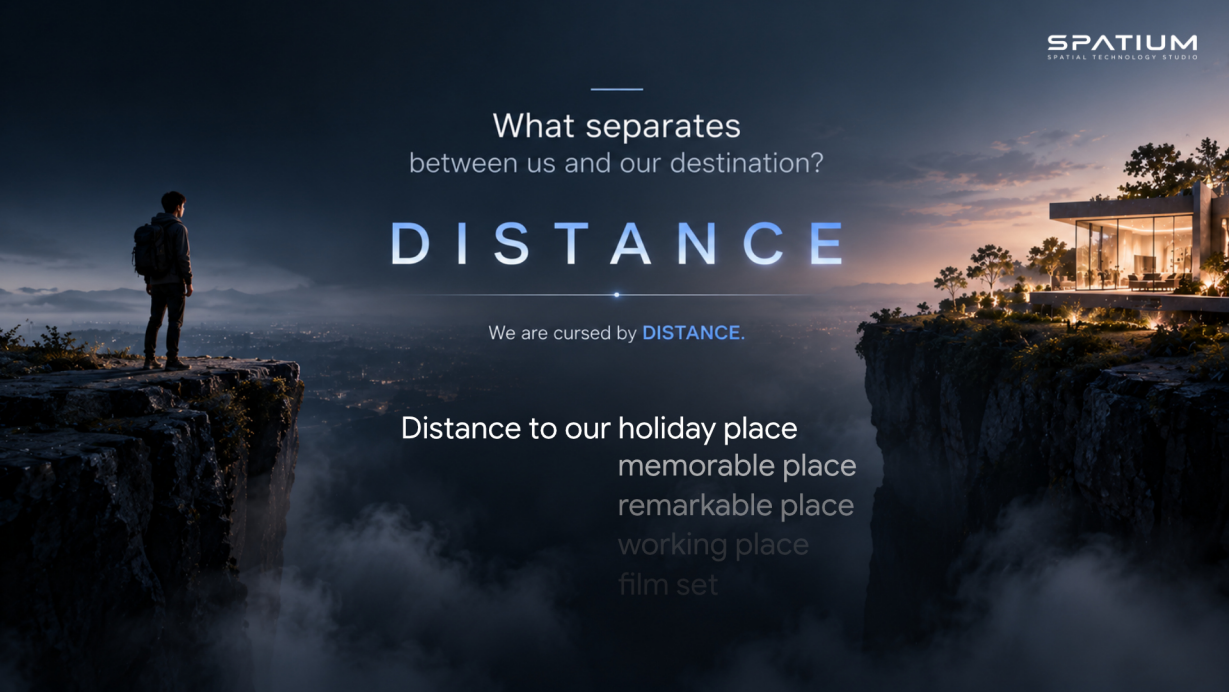
SPATIUM
SPATIAL TECHNOLOGY STUDIO

What separates
between us and our destination?

DISTANCE

We are cursed by **DISTANCE.**

Distance to our holiday place
memorable place
remarkable place
working place
film set



SPATIUM
SPATIAL TECHNOLOGY STUDIO
Walkable Image
Walk, explore, and breath inside
the space as you are truly there

A place can be **seen** from anywhere.
But can it be **experienced** from anywhere too?

SPATIUM
SPATIAL TECHNOLOGY STUDIO

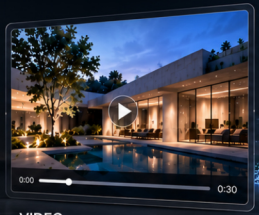
Walk, explore, and breath
inside the image

SPATIUM
SPATIAL TECHNOLOGY STUDIO

Spatial media contains richer information than flat photo or video

PHOTOGRAPHY
captures **an image.**

- 2D view
- Color information
- Limited context
- No depth
- No measurement
- Static



VIDEO
captures **a moment.**

- 2D view over time
- Color information
- Limited spatial context
- Implied depth (no real depth)
- No measurement
- Fixed path (camera movement)

SPATIAL MEDIA
captures **a space.**

- **True spatial context**
  Real-world scale and environment.
- **Real depth (3D structure)**
  Accurate geometry and spatial relationships.
- **Measurement (scale & dimension)**
  Get precise size, distance, and area.
- **Freedom of locomotion (explore)**
  Navigate freely from any angle.
- **Distance and spatial relationships**
  Understand how elements relate to each other.
- **Rich environmental information**
  Geometry, materials, lighting, and more.
- **Revisitable**
  Return anytime, from anywhere.
- **Reusable rich information**
  For further study, analysis, and exploration.
